2013 Engineering Seminar

Prysmian Group would like to invite you to attend their 2013 Engineering Seminar in Lexington, SC, October 23-25, 2013! [Details and Registration](#)

Scope:

This comprehensive seminar covers the history and design of underground primary and secondary distribution systems. The curriculum includes the fundamentals of underground cable systems with a particular emphasis on materials, applications, design, and cable performance. This seminar is presented in a non-commercial format which allows the attendee to focus on choosing the best cable design according to the application.

Who Should Attend:

This seminar is designed for utility standards engineers, consulting and facility engineers involved in the design and/or installation of underground distribution systems. A basic understanding of engineering fundamentals and three-phase power systems is recommended. The material will be engineering intensive but will also cover hands-on subjects such as installation, field handling, testing, and basic system applications.

PDH Credits:

Individuals who successfully complete this seminar will receive **15.5 PDH** credits.

Cost:

There is no fee to attend this seminar. Registrants are responsible for their own transportation and hotel. Please see the [registration form](#) for additional details.

If you have any questions, please contact your Aertker Co representative.
